ASX Announcement

5 December 2024

SUPPLEMENTARY ANNOUNCEMENT

Acquisition of Octava Minerals' Talga Project and Exploration Update

Global Lithium Resources Limited (ASX: GL1) (**GL1 or Company**) provides the following supplementary information to the ASX release made on 4 December 2024 titled "Strategic Acquisition Consolidates Large Scale Gold and Base Metal Target Area".

The historical drill hole exploration results reported for the Talga Project acquisition from WAMEX report numbers A74310 and A77775 included in that ASX release are repeated below.

- TPAC079, 16m @ 1.99g/t Au from 0m
- TPAC080, 5m @ 2.23g/t Au from 24m and 8m @ 1.57g/t Au from 50m
- TPAC088, 13m @ 1.79g/t Au from 42m
- TPAC097, 4m @ 4.69g/t Au from 4m
- TPAC101, 2m @ 6.23g/t Au from 28m
- TPAC102, 5m @ 1.63g/t Au from 2m
- TPRC027, 9m @ 1.12g/t Au from 62m

With respect to the above historical exploration results the Company provides the following supplementary information and notes the cautionary statement included at page 6 in the 4 December 2024 announcement.

- The procedures reported and recording of results in the WAMEX reports appear robust with no reason to doubt the reliability of the results reported. The drilling was undertaken by Mining Projects Group on behalf of Oakover Gold Limited in 2006 and 2007.
- The shallow reconnaissance Air Core drilling was designed to locate the sub-surface extensions of the more obvious gold in soil anomalies at the Razorback gold prospect. Follow on RC drilling tested at depth, some mineralised zones outlined by the shallow Air Core drilling. Drilling intersected anomalous gold mineralisation identified in structurally controlled zones of variably brecciated cherts, silicous / or sulphidic zones. Cross sections, plan view maps, full drilling and assay procedures, are outlined in the lodged WAMEX annual reports.
- No further drilling has been undertaken on the Razorback prospect since 2007 and there is no nearterm plan to undertake further exploration drilling work to enable the Razorback exploration drill results to be reported in accordance with JORC 2012. The company is planning to undertake detailed historic data review and first pass on ground geological mapping programs in 2025. If results warrant, further exploration programs will be undertaken which may include drill testing at depth.

Approved for release by the Board of Global Lithium Resources Limited.

Global Lithium - Mineral Resources

Project Name	Category	Million Tonnes (Mt)	Li ₂ O%	Ta ₂ O ₅ ppm
Marble Bar	Indicated	3.8	0.97	53
	Inferred	14.2	1.01	50
	Total	18.0	1.00	51
Manna	Indicated	32.9	1.04	52
	Inferred	18.7	0.92	50
	Total	51.6	1.00	52
Combined Total		69.6	1.00	52

Competent Persons Statement:

Exploration Results

The information in this announcement that relates to Exploration Results for the Razorback Prospect is based on, and fairly represents, information and supporting documentation prepared by Mr Logan Barber, a full time employee of Global Lithium Resources Limited and who participates in the Company's Incentive Performance Rights and Option Plan. Mr Barber is a member of the Australasian Institute of Geoscientists. He has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the JORC Code. Mr Barber considers that the information in the market announcement is an accurate representation of the available data and studies for the mining project. Mr Barber consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears.

Mineral Resources

Information on historical exploration results and Mineral Resources for the Manna Lithium Project presented in this announcement, together with JORC Table 1 information, is contained in an ASX announcement released on 12 June 2024.

Information on historical exploration results and Mineral Resources for the Marble Bar Lithium Project presented in this announcement is contained in an ASX announcement released on 15 December 2022

The Company confirms that it is not aware of any new information or data that materially affects the information in the relevant market announcements, and that the form and context in which the Competent Persons findings are presented have not been materially modified from the original announcements.

Where the Company refers to Mineral Resources for the Manna Lithium Project (MLP) and the Marble Bar Lithium Project in this announcement (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource estimate in that announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons findings are presented have not materially changed from the original announcement.
